THIS APPLICATION IS SUBJECT TO WITHDRAWAL FROM ISSUE AT THE INITIATIVE OF THE OFFICE OR UPON PETITION BY THE APPLICANT. SEE 37 CFR 1.313 AND MPEP 1308.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

EXAMINER'S AMENDMENT

The application has been amended as follows:

Claims 5 and 6 have been canceled.

The following is a statement of reasons for the indication of allowable subject matter: the art of record considered as a whole, alone or in combination, neither anticipates nor renders obvious a method for manufacturing a regular polyhedral ornament such as a regular dodecahedron or a regular icosahedron (2), comprising the following steps: “cutting first and second faces (31,41) of the regular polyhedron which have the ridges in common based on the cutting base lines (L4,L7); marking auxiliary cutting lines (L1,LH) by drawing on these faces; cutting a new third regular polyhedral face (51) based on the auxiliary cutting lines and the cutting base lines; and drawing auxiliary cutting lines (L12) in sequence every time a new face of the regular polyhedron is cut from fourth(61) to 12th or to 20th faces (141) to thereby cut the cubic workpiece into the regular polyhedron” in the combination as claimed in **claim 1**; **and** “cutting first and second possible cut faces (181,191), which are envisaged in an inner space of the cube, using the cutting tool into first and second faces adjacent to each other based on the cutting base lines which commonly

include any one of the ridges; marking lines forming ridges of the regular polyhedron determined by intersections of the cutting base lines and the faces having been cut by drawing as auxiliary cutting lines on both the first and second faces having been cut; with a new face envisaged in the inner space of the cube being defined as a third possible cut face (201) based on these auxiliary cutting lines and the cutting base lines, cutting the third possible cut face using the cutting tool so as to be formed as a third face of the regular polyhedron; and drawing auxiliary cutting lines (“a” to “f”, “g” to “l”) every time a new face is created by cutting in sequence, to form a possible cut face, thereby allowing the cubic workpiece to be cut into the regular polyhedral ornament” in the combination as claimed in **claim 2**.
